Informed Consent for a Denture (Construction)

I understand that I am having my teeth replaced with a removable denture, which consists of acrylic imbedded in an acrylic base. I understand that a partial denture is retained by my remaining teeth and by gum tissue. Full upper dentures are retained by suction against the palate, and full lower dentures are retained by training the tongue and cheek muscles to hold them in place.

Both upper and lower dentures may require denture adhesive to aid in their retention.

I understand that my dentures will be made using a technique that involves several impressions and fittings. I understand that the typical steps for a denture are as follows:

- | | | |
|-----------------------|---------------------|----------------------|
| 1. Initial Impression | 3. Aesthetic Try-in | 5. Second Impression |
| 2. Final Delivery | 4. Wax Rim | 6. Adjustments |

I understand that although these are the typical steps in the denture process, it may take additional appointments than the ones listed. This may delay the time it takes to complete the denture.

I understand that before the denture is completed, I will be presented with a preliminary set-up of the denture in wax that I can place in my mouth to observe the aesthetics, including the arrangement, shape, colour, and position of the teeth. Any changes need to be made at this stage. Once I approve of the preliminary set up, the denture will be completed and any changes from this point forward will be my financial responsibility, in addition to the full cost of the denture.

I have been given an opportunity to have all my questions answered.

By signing this form, I give my permission to have a denture made. I understand that dentures have their own challenges and are not a complete solution to my dental problems.
