

The Hub Dental Practice

Nicer Smiles by Monica

Introduction

Monica is a very experienced cosmetic dentist. She is currently completing her masters degree in Clinical Dentistry (MCLinDent). Monica has a wide experience of completing cosmetic cases.

Monica offers a wide variety of options to patients.

Case 1

These are real photo's of a case completed by monica.

Whilst most patients spend a long time planning their treatments some patients delaying is not a real option.

As part of the treatment we can do wax up's and modelling to show the before and after results BEFORE WE START!!!

This allows patients to see what their results will be like, and also allows them to compare what we ACTUALLY ACHIEVE with what we promise.

Our Cerec milling machine allows us to offer amazing results on the same day.

We have the Omnicam which is the very latest 3D Camera and the images are then sent to the mill.

Having the Cerec technology means that we can do the shading and staining at the same time as the patient is in the practice. We use the very best staining materials and firing ovens

This allows us to make the small corrections and modifications that create the great results we achieve.

Case 2

These are real photo's of a case completed by monica.

The images speak for themselves.

We do some of the restoration inhouse using the cerec machine.

This allows a same-day result.

However there are cases where we need to use a ceramist and there may be a few days delay.

Obviously there are lots of options for closing gaps apart from veneers and crowns.

We have a Specialist Orthodontist who offer the full range of Orthodontic solutions including invisalign, Clear Clarity braces and lingual braces (Incognito)

However some patients are in a hurry and want an instant result.

35 Years of exerience means we have built a great team and made the investments that are neccessary to provide the best results.

We are an exclusively Private Dental Practice, we have offer Dental carewhich is the best quality combined with great service, all at affordable prices at convenient times.

But it is not just financial investments but also offering a 7 day service.

Our opening hours are designed for the patients who don't want to take time off work or at times when their partner can provide the child minding.

Most cosmetic cases are not multiple crown cases. The vast majority are single tooth cases. However they still require the same amount of planning and preparartion.
